BLACK GENOCIDE IN 21ST CENTURY AMERICA

The claim is that the abortion issue is about privacy, and women's rights, and reproductive freedom.

But that's just marketing hype. In reality, it was EUGENICS that drove the legalization of abortion. And now, a stunning new movie lays it all out with incredible documentation.

The film is called Maafa 21 and it exposes a plan to create "racial purity" that began 150 years ago and is still being carried out right now. It's about the ties between the Nazis, the American eugenics movement and

today's "family planning" cartel. It's about elitism, secret agendas, treachery and corruption at the highest levels of political and corporate America.

Maafa 21 will show you things the media has been hiding and politicians don't want you to know. So if you're ready to see the real agenda behind "choice," fasten your seatbelts ...

IT'S SHOCK AND AWE TIME!
